

## Fixed Frame Polycarbonate Roof Aftercare Information Sheet

**Congratulations on your new Fixed Frame Canopy**

**You will enjoy your awning for years to come**

We have put together some care instructions for you to help keep your polycarbonate roof just like new.

*General Care Instructions for your polycarbonate roof:*

We recommend cleaning once a year doing the following:

- Using mild dish washing liquid and a soft cloth wash the surface of your roof. Rinse off thoroughly. The dish washing liquid causes an anti static agent which helps stop dust collecting.
- Wet and Forget can then be used if you wish, which will help maintain your polycarbonate till the next year.

***DONT'S***

- Do not use abrasives cleaners.
- Do not use harsh detergents.
- Do not use a stiff brush as this will cause scratching.
- Do not use any solvents such as petrol, acetone or similar as it will attack the polycarbonate.
