

Shade Sail Aftercare Information Sheet

Congratulations on your new Shade Sail

You will enjoy your shade sail for years to come

We have put together some care instructions for you to help keep your shade sail just like new.

General Care Instructions for shade sail cloth:

- Using a high volume water blaster and patio cleaner attachment, water blast the shade cloth.
- For stubborn dirt, or if attempting to use a standard water blaster, a spray with 30 seconds or similar mould remover before blasting could help.
- We recommend this treatment on a regular basis i.e. every 6-12 months or when required.

DONT'S

- Do not use abrasives cleaners.
- Do not use harsh detergents.
- Do not use any solvents such as petrol, acetone or similar as it will attack the shade cloth.
